

PRODISC Systems

CD EXPRESS SERVICE:

- ▶ Duplication
- ▶ CD Face (Inkjet) Printing Process

 3mm bleed - extend artwork 3mm over shaded non-printable areas

Drawing not to scale

- Ensure information is 3mm away from the edge of finished artwork
- All images must be at least 300 dpi
- All artwork to be supplied as CMYK (printed on white background)
- Please prepare artwork as high resolution PDF
- All fonts must be embedded or included with final artwork
- Please supply final artwork on a separate, quality, CD-R/DVD-R with content master or email to graphics@prodisc.com.au
- A high resolution printed colour proof **must** be supplied- if not supplied, no responsibility can be taken for colour accuracy
- For best colour matching (especially for replication) chemical proofs are highly recommended
- If you require more information please call **PRODISC** 02 9016 4415
